

use the periodic table as a classification system and compile data about its structure (210-1, 210-2)

Devoir #3 – Indiquez les parties suivantes sur le tableau périodique:

- | | | |
|-----------------------------------|---|----------------|
| <input type="radio"/> Métaux | <input type="radio"/> Métaux alcalins | # des groupes |
| <input type="radio"/> Non-métaux | <input type="radio"/> Métaux alcalino-terreux | # des périodes |
| <input type="radio"/> Métalloïdes | <input type="radio"/> Halogène | |
| <input type="radio"/> Solide | <input type="radio"/> Gazes rares (Nobles) | |
| <input type="radio"/> Liquide | <input type="radio"/> Lanthanides | |
| <input type="radio"/> Gaz | <input type="radio"/> Actinides | |

The image shows a blank periodic table grid. On the left side, there is a red bracket that spans the first two columns of the table, indicating that these columns are the focus of the assignment. The grid is composed of several rows and columns, with the first two columns being the most prominent.
